MK 2 Restricted Sampling Kit

Application

This Winder meets the need for taking accurate samples under restricted conditions, and where sample sizes of up to 500 ml are required. It will accept samplers with an overall diameter of up to 45 mm.

It is designed to fit directly onto a 2-inch (50 mm) vapour control valve, with coupling supplied to suit. The winder can also be supplied with an adaptor to suit alternate valve types. This feature is useful when sampling several different vessels with differing valve types.

The sampler itself is enclosed within the winder's main tube, so vapour and/or gas present above the cargo can escape only through the small gap in the top valve, through which the cable passes.

The winder incorporates our winding handle, which locks the reel automatically as soon as the operator releases the winding knob.

The winder includes a gear-driven depth counter, to give the operator a clear indication of the depth of the sampler at all times throughout the sampling process.

Winder Specifications

Sampling / Gauging depth	Up to 30m
Weight of winder	4.5kg
Sample volume	Up to 500ml
Material	316 Stainless Steel
Overall Height	68cm

MK 2 Winder with MMC Type 2-inch coupling
(alternative coupling available to suit)

The range of sampling equipment included in this system, for use with the MK 2 winder, offers representative samples under safe conditions saving time and money.
